

DRI-EAZ BD1000

Industrial Dehumidifier D/V

Product Code: F435-DV

The BD1000 dehumidifier delivers strong dehumidification performance, durability and reliability within a unique, portable design that withstands the rigours of construction sites and hire. The rotomoulded polyethylene cover is dent resistant, easy to wipe clean, and hinges open for fast access for internal cleaning. Anti-clog design includes double-width coil fin spacing and optional filters to improve performance in dusty environments and reduces cleaning and maintenance costs.

The BD1000 automatically switches between 110v and 230v, depending on the power source. Simplified user controls include rotary on/off switch and manual condensate purge. A flush-mounted hour counter helps plan maintenance schedules and on-board kilowatt-hour meter provides accurate power consumption. Regular, automatic condensate pumpout allows unattended use. A rigid handle, large semi-pneumatic wheels and built-in vehicle loading skids ensure easy transport and maneuverability.

Model	DriEaz BD1000
Voltage (V)	110/230
Weight (Kg)	39
Typical Extraction (L/d)	25
Current (A)	3.3/6.5
Power (kW)	0.72 @ 110V / 0.76 @ 230V
Dimensions (HxWxDmm)	850x500x510
Hour kWh Counter	Yes
Water Pump Out	Automatic
Operating Temp (min & max)	1 & 38
